

Whether you run a golf course, park or recreational area; manage a condo association or hotel; oversee a corporate campus; or own a distinctive private residence, you can enhance its beauty with a Fountain Technologies Floating Fountain.

Not only beautiful, a floating fountain can lower your chemical usage. While copper sulphites and specialized herbicides may help, most experts agree that some form of aeration works best to control algae and weed growth.

Environment and aquatic life will also benefit from the replacement of the oxygen level and the destratification of stagnant water.

Typical operating cost of a Fountain Technologies' Floating Fountain? Less than a dollar a day.

The delight and fascination of water, featuring

- traditional fountains
- splash pads
- reflecting pools
- waterfalls
- water and granite walls
- zero depth
- floating fountains
- aeration systems
- interactive (music, lights and multi-media)

Our planning staff starts with an understanding of your vision and goals. Then our award-winning professionals interpret, design, engineer, construct, maintain or restore your water feature.

# fountain technologies

**PUMP SYSTEM** operates in as little as 5 feet of water. Includes 6" PVC screen to filter debris, improve aeration and extend motor life. All parts are plastic or stainless steel for maximum corrosion resistance. Foam-filled floatation system. Choice of 3 nozzles (detailed below).  
**LIGHT KIT** provides a stainless steel housing with clear lenses. Includes 3 LED lamps, 100 feet of cable, waterproof splice kit, and all mounting hardware. Red, Green and Blue lenses available.  
**CONTROL PANEL** is lockable and waterproof with an internally-mounted GFI.2, adjustable 24-hour timers, heat shrink splice kit and 100 feet of cable.

You can rely on Fountain Technologies' experience and knowledge for all your floating fountain needs. Since 1999, we have been providing:

- Installation
- Removal
- Off-Season
- Protected Storage
- Repairs
- Maintenance
- Service

Fountain Technologies also gives you the option to rent or lease a Floating Fountain. Rentals are ideal for grand openings, parties, weddings and other special events. Leasing is a consideration for seasonal usage or to try before you buy.

Rental and leasing programs are all inclusive with installation, maintenance and removal.
